IT'S CLEAN, IT'S LEAN—IT'S THE MEAN STACK

By the end of this streetwise intro to MEAN stack development, you'll know MongoDB, Express, AngularJS, and Node.js well enough to create your own production-grade, full-stack JavaScript web app.

Build your HTML, CSS, JavaScript skills using this book and MEAN technologies:

- Crank up Node.js on your local machine. Download modules using npm. Then grasp the keys to the Node.js programming model.
- Use Node to create, retrieve, update, and delete data from a Mongo store.
- Build the essential Express skills—fast—as you get to grips with routes and middleware.
- Master Angular fundamentals like data binding, directives, controllers, routing, and services.
- Oh, and build a complete working app using the MEAN stack along the way.

And much more...

SITEPOINT BOOKS

- ✓ Advocate **best practice** techniques
- ✓ Lead you through **practical** examples
- ✓ Provide **working code** for your website
- ✓ Make learning **easy** and **fun**

YOUR AUTHORS

**ADAM
BRETZ**

Adam Bretz is a software engineer focusing on client and server side JavaScript. Adam earned his Bachelor of Science in Computer Science in 2007 from Millersville University of Pennsylvania. At a previous job, Adam was part of the team of engineers that helped migrate the company from PHP to a pure JavaScript solution. Adam currently resides in the Pittsburgh area with his wife, Jenna.

**COLIN J.
IHRIG**

Colin J. Ihrig is a software engineer, working primarily with Node.js. Colin is the author of Pro Node.js for Developers, and is currently the managing editor of SitePoint's JavaScript channel. Colin received his Bachelor of Science in Engineering, and Master of Science in Computer Engineering from the University of Pittsburgh in 2005 and 2008, respectively.
